Experience

Globe Telecom PH Intern **July 2026 - September 2026**

- Architected dynamic operational dashboards and automated workflows within Google Workspace to track and reflect **critical VIP service metrics** across enterprise teams.
- Engineered large-scale data processing pipelines using Google Colab for multiple CSV datasets and Google Apps Script to aggregate, transform, and sync data across master spreadsheets containing over **30 million data cells.**

SOFI AI Tech Solution Inc. AI Intern **May 2026 - July 2026**

- Refactored legacy backend infrastructure by utilizing LangGraph, FAISS, Google Cloud Storage, and Cloud Run, successfully reducing the client chatbot's response latency **from 2 minutes down to 4–10 seconds (30x speedup)**; optimized the system architecture to scale seamlessly **across thousands of internal documents**, enabling administrative personnel and **80+ distributed branches** to retrieve critical enterprise files instantly.
- Developed a highly scalable AI-driven onboarding website to convert property PDFs into Markdown and dynamic templates; integrated Google Apps Script and Sheets to automate contract generation instantly, eliminating tedious manual data entry to **process 100+ page document batches in minutes** for the client's operations team.

Education

University Of Makati Makati City, Philippines

- Bachelor of Science in Computer Science Major in Application Development, Expected 2027

Projects

Full-Stack & AI Engineer (Web & Mobile) **June 2026 - Present**

- **Alunsina — AI Pet Healthcare & Teleconsultation Platform |** React native + Expo, NestJS, FAISS, LangGraph
  - Architected a dedicated AI microservice integrated with the mobile application, utilizing LangGraph for dynamic conversational routing and a FAISS-indexed RAG pipeline across **1,000+ clinical documents** to deliver sub-second, context-aware triage for dogs, cats, and rabbits.

Full-Stack Developer **September 2025 - April 2026**

- **UMak Kalinga & CCED Admin Dashboard |** React + Capacitor, Node.js + Express, Firestore, TypeScript
  - Engineered a community ecosystem pairing a cross-platform mobile client with a TypeScript administrative portal, enabling real-time campaign creation and inventory tracking for **100+ students** across **500+ simulated concurrent donation campaigns**.
  - Architected a centralized Node.js/Express backend orchestrating shared business logic across both user and administrative interfaces; optimized API data serialization to maintain **sub-200ms latency** and **200 requests per second (RPS)** during stress testing against **5,000+ simulated concurrent users**.

Awards & Activities

- **Top 10 Finalist & Cash Prize Winner, eGovPH Hackathon 2026 (July 2026)**
  - Awarded a **₱100,000 cash prize** as a **Top 10 finalist out of 1,500+ participants**, building an integrated disaster reporting and household assessment module for the eGovPH Super App ecosystem.
- **Champion, Java Programming — Infotechnolympics 2025**
  - Competed against **15+ top computer science students** across multiple year levels at the University of Makati, optimized solutions for LeetCode-style algorithmic and OOP challenges in Notepad-Java Compiler.
- **Java Programming Competitor — 14th IT Skills Olympics (2025)**
  - Represented UMak in Java Programming category nationwide; engineered optimized, LeetCode-style algorithmic Java solutions in Notepad-Java Compiler against **50+ competitors** from **60+ universities**.

Technical Skills

- Programming Languages: TypeScript, JavaScript, Python, C#, Java, PHP, SQL
- AI & Orchestration: LangChain, LangGraph, RAG, NLP, FAISS
- Frontend & Mobile: ReactJS, React Native + Expo, React + Capacitor
- Backend & Cloud: Node.js + Express.js, NestJS, Google Cloud Platform (Cloud Run, GCS), REST APIs
- Databases: Firebase/Firestore, MySQL, PostgreSQL
- Tools & AI Assistants: Git, GitHub, Docker, Postman, Vercel, Claude Code, Codex, OpenCode Go
